- Hazardous Area Classification (HAC)
- Hazard and Operability Study (HAZOPs)
- Hand Arm Vibration

Principal Designer Role

Having safety, technical and expertise in this duty holder role has been a strategic part of our development as a business which we have now evolved into a model that offers multi-skill set and reduced costs simultaneously. We are not aware of any other consultant who operate in this manner. As aforementioned, our work with other Blue-Chip companies has a proven track record of delivering this initiative expediently.

Our remit would typically include:

- Conducting Risk Register updates and first stage involvement in the assembly.
- Review of all issued DWGs
- Liaising with all appointed designers and acquisition of necessary update information
- Oversee all process of design development / review and attendance at all design review meetings
- Making an assessment of interdependencies in Design (e.g. Civils and Steelwork – Imposed Loads etc)
- Produce and upkeep an outline Design Risk Register(s) and integrate existing data from all the design teams
- Maintain the full PCI pack with appendices (Adopted as our own and covered by our PI)
- Review contractor proposals and issued safe systems
- Review the Construction Phase Plan (Issued by the PC)
- Survey the site fully with a view to further developing both the PCI and Design Risk Registers
- Prepare and maintain the H&S / O&M Files.

CDM Residency (Principal Contractor)

- Development of Construction Phase Plan along with daily maintenance and upkeep
- Conveyance of Site Rules to Sub-Contractors
- Development of Traffic Management Plans and its revision
- Oversee daily risk assessment processes and daily change management directives.
- Appraisal of “risk assessments” and Method Statements
- Conduct compliance audits of all site areas; report on findings and manage action closures.
- Carry out evaluation of all working methodologies and special processes as required by the project, including Lift Plans, Temporary Works, Mechanical, Equipment, Steelwork, Civil, Electrical etc.
- Co-ordinate and Manage first aid and fire safety for the CDM sites.
- Carry out investigations into all accidents and near-miss incidents and to record the findings
- Advise the Client of all incidents reportable under RIDDOR 2013 and carry out investigation into root and underlying causes
- Work closely with the Client and Principal Designer in relation to project communications
